Please understand that each time one of these cockamamie ideas surfaces from the bowels of the bureaucracy, the public can only shake its collective head in disbelief that such a concept could happen in America. The cost and effectiveness of such a program does NOT correlate to the deterrence of terrorists in spite of what the bureaucrats may postulate. The terrorism will continue via means undetectable by such frivolities and the vast majority of inconvenienced travelers will have further reason to distrust their government as it careens toward an attempt at Soviet style control of every aspect of their lives. Passing laws and instituting such silliness as this "big brother" prophylactic measure focuses on the wrong issue. Our failure to recognize the evilness of humans and their lack of respect for right and wrong (as exemplified by the bubba bozo approach to leadership) will never be overcome by the good intentions of the FAA and all the other humpty dumpty federal big brothers in this country. Check the public response to the "Know Your Customer" program in the banking world. It's no wonder there is such a growth of militias and other "patriotic groups" in our culture. They virtually have no choice in the face of the continued harassment of individuals by the government and the abdication of the basic government responsibility to preserve the freedom of its citizens.
